

The Journal of DementiaCare

For all who work with people with dementia

Vol 27 No 3 May/June 2019

Inside this issue...

■ Project updates & viewpoints

The future of technology in dementia detection and care 12

Smart technologies will one day transform the detection, care and treatment of dementia, says Thomas Sawyer. He looks at what the future holds as artificial intelligence replaces pen and paper

Good morning Alexa: what can you do for me today? 14

If you believe Amazon, the company's voice-activated assistant Alexa will run your life for you if you let it. But is it true? We asked some people living with young onset dementia to tell us how they use Alexa and whether she is good value

LGBT awareness training: learning from Australia 16

Allison O'Kelly travelled the length and breadth of Australia to research awareness and care for LGBT people who develop dementia. She found widespread good practice, initiatives and training materials, and much for the UK to emulate

'Dear Alzheimer's': a diary of living with dementia 18

Then a primary school head teacher in Kent, Keith Oliver was just 54 when he was diagnosed with young onset Alzheimer's. In his new book, a diary of living with dementia, he talks about the experience and all that has happened since

Placing faith in relationships 20

Is evidence-based practice always desirable? Luke Tanner argues for a different approach based on emotionally fulfilling relationships

■ Features

Young dementia: the specialist keyworker role 25

Young onset dementia (YOD) too often goes unrecognised and services are frequently sparse and uncoordinated. Jacqueline Hussey and Hilda Hayo make the case for specialist keyworkers who can help people with YOD find the right support

A different understanding: a conversation about art 28

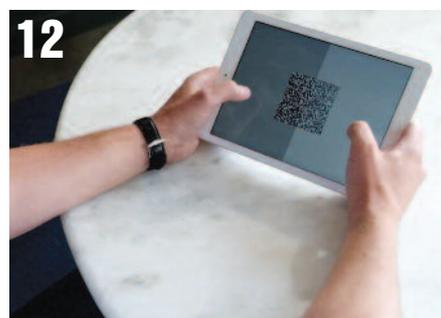

Art enables us to see dementia as much more than a biomedical condition. Hannah Zeilig and Julian Hughes engage in conversation about how artistic collaboration can help people with dementia connect with the world around them

Good design for people with dementia in hospital 32

Hospital environments can have a big influence on the wellbeing of patients with dementia. In the third article of our series on hospital dementia care, Sarah Waller sets out principles of good design

Communication training: creating videos together 36

A study of everyday interactions between people with dementia and their supporters gave valuable insights into the principles of good communication. Joseph Webb and colleagues report on their findings
